

SUMMARY

Passionate Computer Science student with a solid foundation in programming, algorithms, and software development. Proven ability to excel in collaborative projects and deliver innovative solutions using emerging technologies. Eager to leverage my skills and creativity to drive impactful results and shape the future of tech.

EDUCATION

ILLINOIS INSTITUTE OF TECHNOLOGY

Master of Science in Computer Science

Chicago, Illinois

Aug'23 – May'25

Coursework: Advanced Databases Organization, Mobile Development Application, Science of Programming, Introduction to Information Security, Cloud Computing, Computer Networks, Big Data Technologies, Software Management, Parallel and Distributed Systems, Data Preparation and Analysis

JAIN UNIVERSITY

Bachelor of Technology in Information Science and Engineering

Bangalore, India

Aug'18–Jul'22

Coursework: Software Engineering, Problem-Solving through Programming, Data Structures with C, Object-oriented programming using Java, Python Programming, Automata Theory and Logic, Design and Analysis of Algorithms, Object-oriented Design, and software testing

SKILLS

Programming Languages, Tools- Python, C, C++, Java, Dart, Flutter, R Programming, Linux, IntelliJ IDEA, Eclipse, VS Code, GitHub.

Databases & Data Science- NoSQL, MongoDB, Oracle SQL, MySQL, Machine Learning Algorithms, Pandas, NumPy, scikit-learn, TensorFlow, OpenAI.

Web Development, Cloud & DevOps- HTML, CSS, JavaScript, Git, Bash Scripting, RESTful APIs, AWS, GCP, Docker, Kubernetes, Scrum, Kafka.

Other skills - MS Office, AI, Data Visualization (Matplotlib, Seaborn, Tableau), Problem-Solving, CI/CD, Version Control, Cloud Computing.

EXPERIENCE

Illinois Institute of Technology

Chicago, USA

System Administrator

Mar'24–Present

- Managed and provisioned cloud resources on **Chameleon Cloud** for 100+ students, ensuring efficient access to systems for academic projects and research while maintaining high availability.
- Automated cloud resource allocation and user management using **Python** and **Bash**, streamlining the assignment process and reducing manual tasks by 30%.
- Provided technical support and troubleshooting for students working in cloud environments, assisting with system configurations and ensuring seamless deployment of applications.
- Contributed to the management and maintenance of the **cloud server room**, ensuring optimal performance, **security**, and uptime for cloud resources used by students and faculty, supporting a seamless environment for academic and development purposes

Adobe

Bangalore, India

Technical Consultant 1

Feb'23 – Aug'23

- Developed scalable software solutions and automation tools for **Adobe Creative Cloud** apps (Photoshop, Acrobat, InDesign, Premiere Pro) using **JavaScript**, **Node.js**, and **REST APIs**, optimizing backend integration and improving task efficiency.
- Implemented a chat and call routing system for Adobe's OAC (Operational Assistance Chat) using **JavaScript** and **cloud technologies (AWS)**, reducing customer wait times by 28% and improving agent connections.
- Contributed to the development and maintenance of Hendrix, a customer database tool, using **SQL**, **Python**, and **Docker**, ensuring real-time data access and seamless updates for improved decision-making.
- Implemented robust security measures to safeguard sensitive information within PDF documents, ensuring data confidentiality and integrity.

Riversand Technologies

Bangalore, India

Full Stack Developer

Jul'21 – Oct'21

- Developed and optimized application modules using **Java** and **Python**, applying object-oriented principles and design patterns to ensure clean, efficient, and maintainable code.
- Collaborated with cross-functional teams to design and implement microservices in Java, improving backend system performance and scalability while ensuring seamless integration with RESTful APIs.
- Worked with Big Data technologies such as **Kafka** and **Apache Storm** to enhance real-time data processing, leveraging distributed systems for high availability and performance.

PROJECT

Secured Authentication Process Using Morse Code & Machine Learning

Chicago, USA

- Designed and implemented a GUI with PyQt5, enabling users to register and log in using eye blinks instead of traditional passwords, enhancing accessibility and security. Utilized the Haar Cascade algorithm for detecting eye movements and blinks, enabling a reliable and real-time method for user authentication.
- Developed a custom authentication flow where users could register by inputting their credentials, which were then encoded into Morse code for secure login through eye blinks during future sessions.
- Integrated a secure database to store and retrieve user credentials, utilizing Pandas for efficient data management and handling of user information. Enhanced security and accessibility by replacing traditional login methods, providing an innovative, hands-free approach to authentication, suitable for diverse user needs.

DISTINCTIONS

- Community:** NSS (National Social Service), Rotaract Bangalore South, Covid-19 Volunteer, Indian Student Association
- Interests:** Soccer Team captain, Winner of BMS Valorant Esports Open tournament
